## PROFESSIONAL PROFILE

A conscientious, competent and committed individual with a strong foundation in software engineering and programming principles. Knowledge of systems development methodologies such as agile and scrum and the associated techniques: Real Time Analysis and Design (RTAD), Data Modelling (DM) and Usability Engineering (UE). I am able to demonstrate code maintenance, version control and testing. A driven and dynamic forward thinking individual with outstanding problem solving skills and the ability to work independently or collaboratively to deliver beautiful products within specific deadlines. I am looking forward to applying the acquired gamut of skills in a challenging role.

## EXPERIENCE

### DEPT - Junior .NET Developer - June 2022 - present

- Reviewing existing code written by other developers to identify bugs and errors.
- Implementing new features based on client requests.
- Using Cloud Services such as Azure Dev Ops and Bitbucket.
- Testing Api's in postman.
- Using AWS to review logs, and help identify bugs.
- Working with CMS's such as Tridion, Sitecore, optimizely and umbraco to manage content on websites.
- Collaborating with developers to implement new web features.
- Participating in code review processes to identify security risks or issues with code quality, before being released to the public.
- Using Jira to estimate new tickets, plan and track new features to be added.
- Leading projects, ensuring that sprints were finished on time, dealing with any problems that arose during the development/client review phase.
- Discussing project requirements with clients, providing development quotes and building strong relationships.
- Carrying out deployments to all environments via azure dev ops, team city, octopus and optimizely paasportal
- Wrote SQL statements
- Debugging and troubleshooting web applications

### Ctalk - Junior Software Developer - October 2021 - May 2022

- Implemented new features/maintaining existing code, fixing bugs in frontend applications using Javascript Html and CSS.
- Using Cloud Services such as Azure Dev Ops for push and pull requests.
- Using Asp.Net Core to develop the backend of applications
- Rest Apl development in C# and ElectronJS
- Reviewing other developers code.
- Using IIS to review logs during the testing of API requests to the main server using postman and fiddler.
- Working in agile environment
- Collaborating with CEO and senior developers to assist with design concepts and planning implementations for new projects.

## SKILLS

- C#
- ASP.NET Core
- .Net Framework
- ASP.NET MVC
- Azure DevOps
- Git/Gitflow
- MS SQL
- SQL
- Optimizely
- Sitecore
- Agile development
- Debugging

## TRAINING/COURSES

- Sitecore .NET Developer 10 Certification Exam
- .NET Core MVC - The Complete Guide 2023 [E-commerce app]
